

# ENHANCE-D

Enhancing Dental Health Advice

*A study to investigate whether the offer of standard NRT or an e-cigarette starter kit provided by a dental professional is an effective, cost-effective and safe aid to help smokers attending a dental practice to stop smoking, compared to usual care, and for those with periodontitis, to investigate whether this leads to improved outcomes for periodontal therapy.*

## WE ARE RECRUITING!

ENHANCE-D is recruiting **56 dental practices across the UK** to start immediately. The only requirement is that the practice can't be fully private—there must be a contract for some NHS adult care.

### Why take part?

#### Work experience:

Two team members trained as stop smoking practitioners – you will be paid for your time and eCPD provided

#### Research experience:

Participation in a large multi-centre randomised controlled trial.

#### Career development opportunities for the dental team :

Dental Hygienists and Dental Therapists will have the opportunity to act as 'Principal Investigators' and lead the research at each site (with support). Additionally, any member of the dental team can deliver all the study visits. Dentists can also do all of these roles if preferred.

#### Reimbursement

Your practice will be paid £2981 to contribute towards the staff time taken to do the training. You will then we paid approx. £180 from Newcastle University and £100 from your local CRN for each participant you recruit into the study.

**Newcastle University**

The Newcastle upon Tyne Hospitals
